

A Home *for* the Holidays

Ana and Harwin made a gingerbread house, but it needs color!

You can also count how many of each candy they used.

How many candy canes? Candied oranges? Peppermints?

Lollipops? Licorice sticks?

A Home *for* the Holidays

Write down your candy counts. Then make a bar chart! Look at the numbers at the bottom of the chart (the x-axis), and for each candy, draw a bar stretching out to touch the line matching the number you counted.

Number of Candies Used for the Gingerbread House
